Option diagonal holes

General characteristics

Working area	2000 x 1000 mm
Table height	850 mm
Load capacity	8000 kg
height of side panels	200 mm
Hole diameter	28 mm

Dimensions and weight

Weight	712 kg

Description

- Fully milled table top 25 mm in S355J2+N with high degree of accuracy (+/- 0.05 mm) and rounded edges and holes

- Hard chrome-plated table surface Cr75

The main advantage of our tables compared to conventional systems is with the hard chrome plating Cr75, that this process achieves a much deeper penetration into the base material of up to 0.07 mm and the hardness of the surface reaches up to HV750. This also ensures optimum and lasting anti-spatter adhesion on the surface, which is one of the most efficient on the market.

- Exact dimensional and fitting accuracy of the tools with 28 mm perforation (compatible with comparable premium suppliers)

- Grid lines 100 x 100 mm

- 4 solid table feet with load capacity 2 ton/feet and levelling option

- Different foot variants available (standard, height-adjustable and with castors)

- Load capacity 8 to

- All-round 200 mm high side cheeks with diagonal perforation

- 2-sided millimetre scaling

- Substructure with stiffeners

Option (price on request):

Diagonal holes
