The positioners are available in standard sizes for load capacities from 150 kg to 3,000 kg.

The frame is optimally designed for rotation and tilting operations.

The positioners consist of a motor, gearbox, table tilting system, steel gears, and control system and are structurally optimally protected.

For heavy workpieces, the positioners are mounted on the floor.

The tables have radial T-slots that enable quick clamping of the workpieces.

Tilting and rotation are controlled by steel gears.

For safety, the positioner is equipped with a reduction gear that holds the table in the desired position.
