General characteristics

Dimensions and weight

Description

The **Bison 3544-200-5-P** is a **3-jaw precision flat-spiral chuck** with a diameter of 200 mm (8 inches) and an integrated size 5 Camlock short-taper mount in accordance with DIN 55029. The suffix 'P' (Premium/Precision) denotes the highest accuracy class (Class 1).

Key technical features:

- Chuck type: 3-jaw centring chuck (self-centring).
- Body material: Robust, forged steel for high speeds and a long service life.
- Mounting: Camlock Type D (DIN 55029), taper size 5. Mounting is carried out directly via the stud bolts on the machine spindle, without the need for an additional flange plate.
- Accuracy class: Precision class (First Class Accuracy / Class 1).
- Through-bore: Yes, with a clear passage of 55 mm.
- Jaw type: One-piece, hard solid jaws. The scope of supply includes one set of drilling jaws and one set of turning jaws as standard.

Quality features

- Durability: Hardened and ground working and guide surfaces ensure repeatability over the long term.
- Smooth running: A balanced flat spiral reduces vibrations to a minimum at high speeds.

Notice

Prices ex location, excluding VAT.
