Description

The AL 1 can be used to notch pipes with an external diameter of 26.9 mm (3/4"), 33.7 mm (1") and 42.4 mm (1 ¼"). The hand-operated machines can be easily wall mounted. With ALMI pipe notchers filing or milling pipes has become a thing of the past.

The major benefit of this pipe notcher, compared to other notchers, is that one unit can be used to notch a series of diameters without needing to change parts for each diameter.

All the benefits in a nutshell: high productivity, low investments, simple and rapid operation, a number of diameters are available immediately, ideal for double corner joints.
