Sheet thickness range - mild steel	150 mm
Brush diameter	150 mm
Vacuum area	250x350 mm
Table height	945 mm
Motor	0.75 kW

Dimensions and weight

Length	1400 mm
Width	1000 mm
Height	1450 mm
Weight	300 kg

Description

Easy T is a manually operated deburring machine suitable for various metalworking processes such as grinding, deburring, edge rounding and polishing for various types of materials - stainless steel, steel, copper, brass and aluminum.
The grinding head with two rotating tools (grinding wheel or brush) is mounted on a swivel arm.

The Easy T is equipped with a freely adjustable speed and a vacuum system, so that workpieces are fixed on the table. It is a cost effective and effective solution for conventional grinding and deburring. All edges of the workpiece are machined from all angles and directions. The grinding head can be swiveled through 180 ° and enables a quick change of the grinding tool.

Properties:

- The grinding pressure is applied manually.
- When deburring from above, the workpieces are pressed onto the high-grip lid.
- Fast processing, low costs

The brush ensures the rounding of the edges of the workpiece. The standard brushes have a diameter of 150 mm. To deburr the product, use a support pad with a grinding disc. Depending on the height and hardness of the burr, you can set the grinding wheel at a slight angle to allow more pressure on the burr.
