MEMOLI

BENDING MACHINES

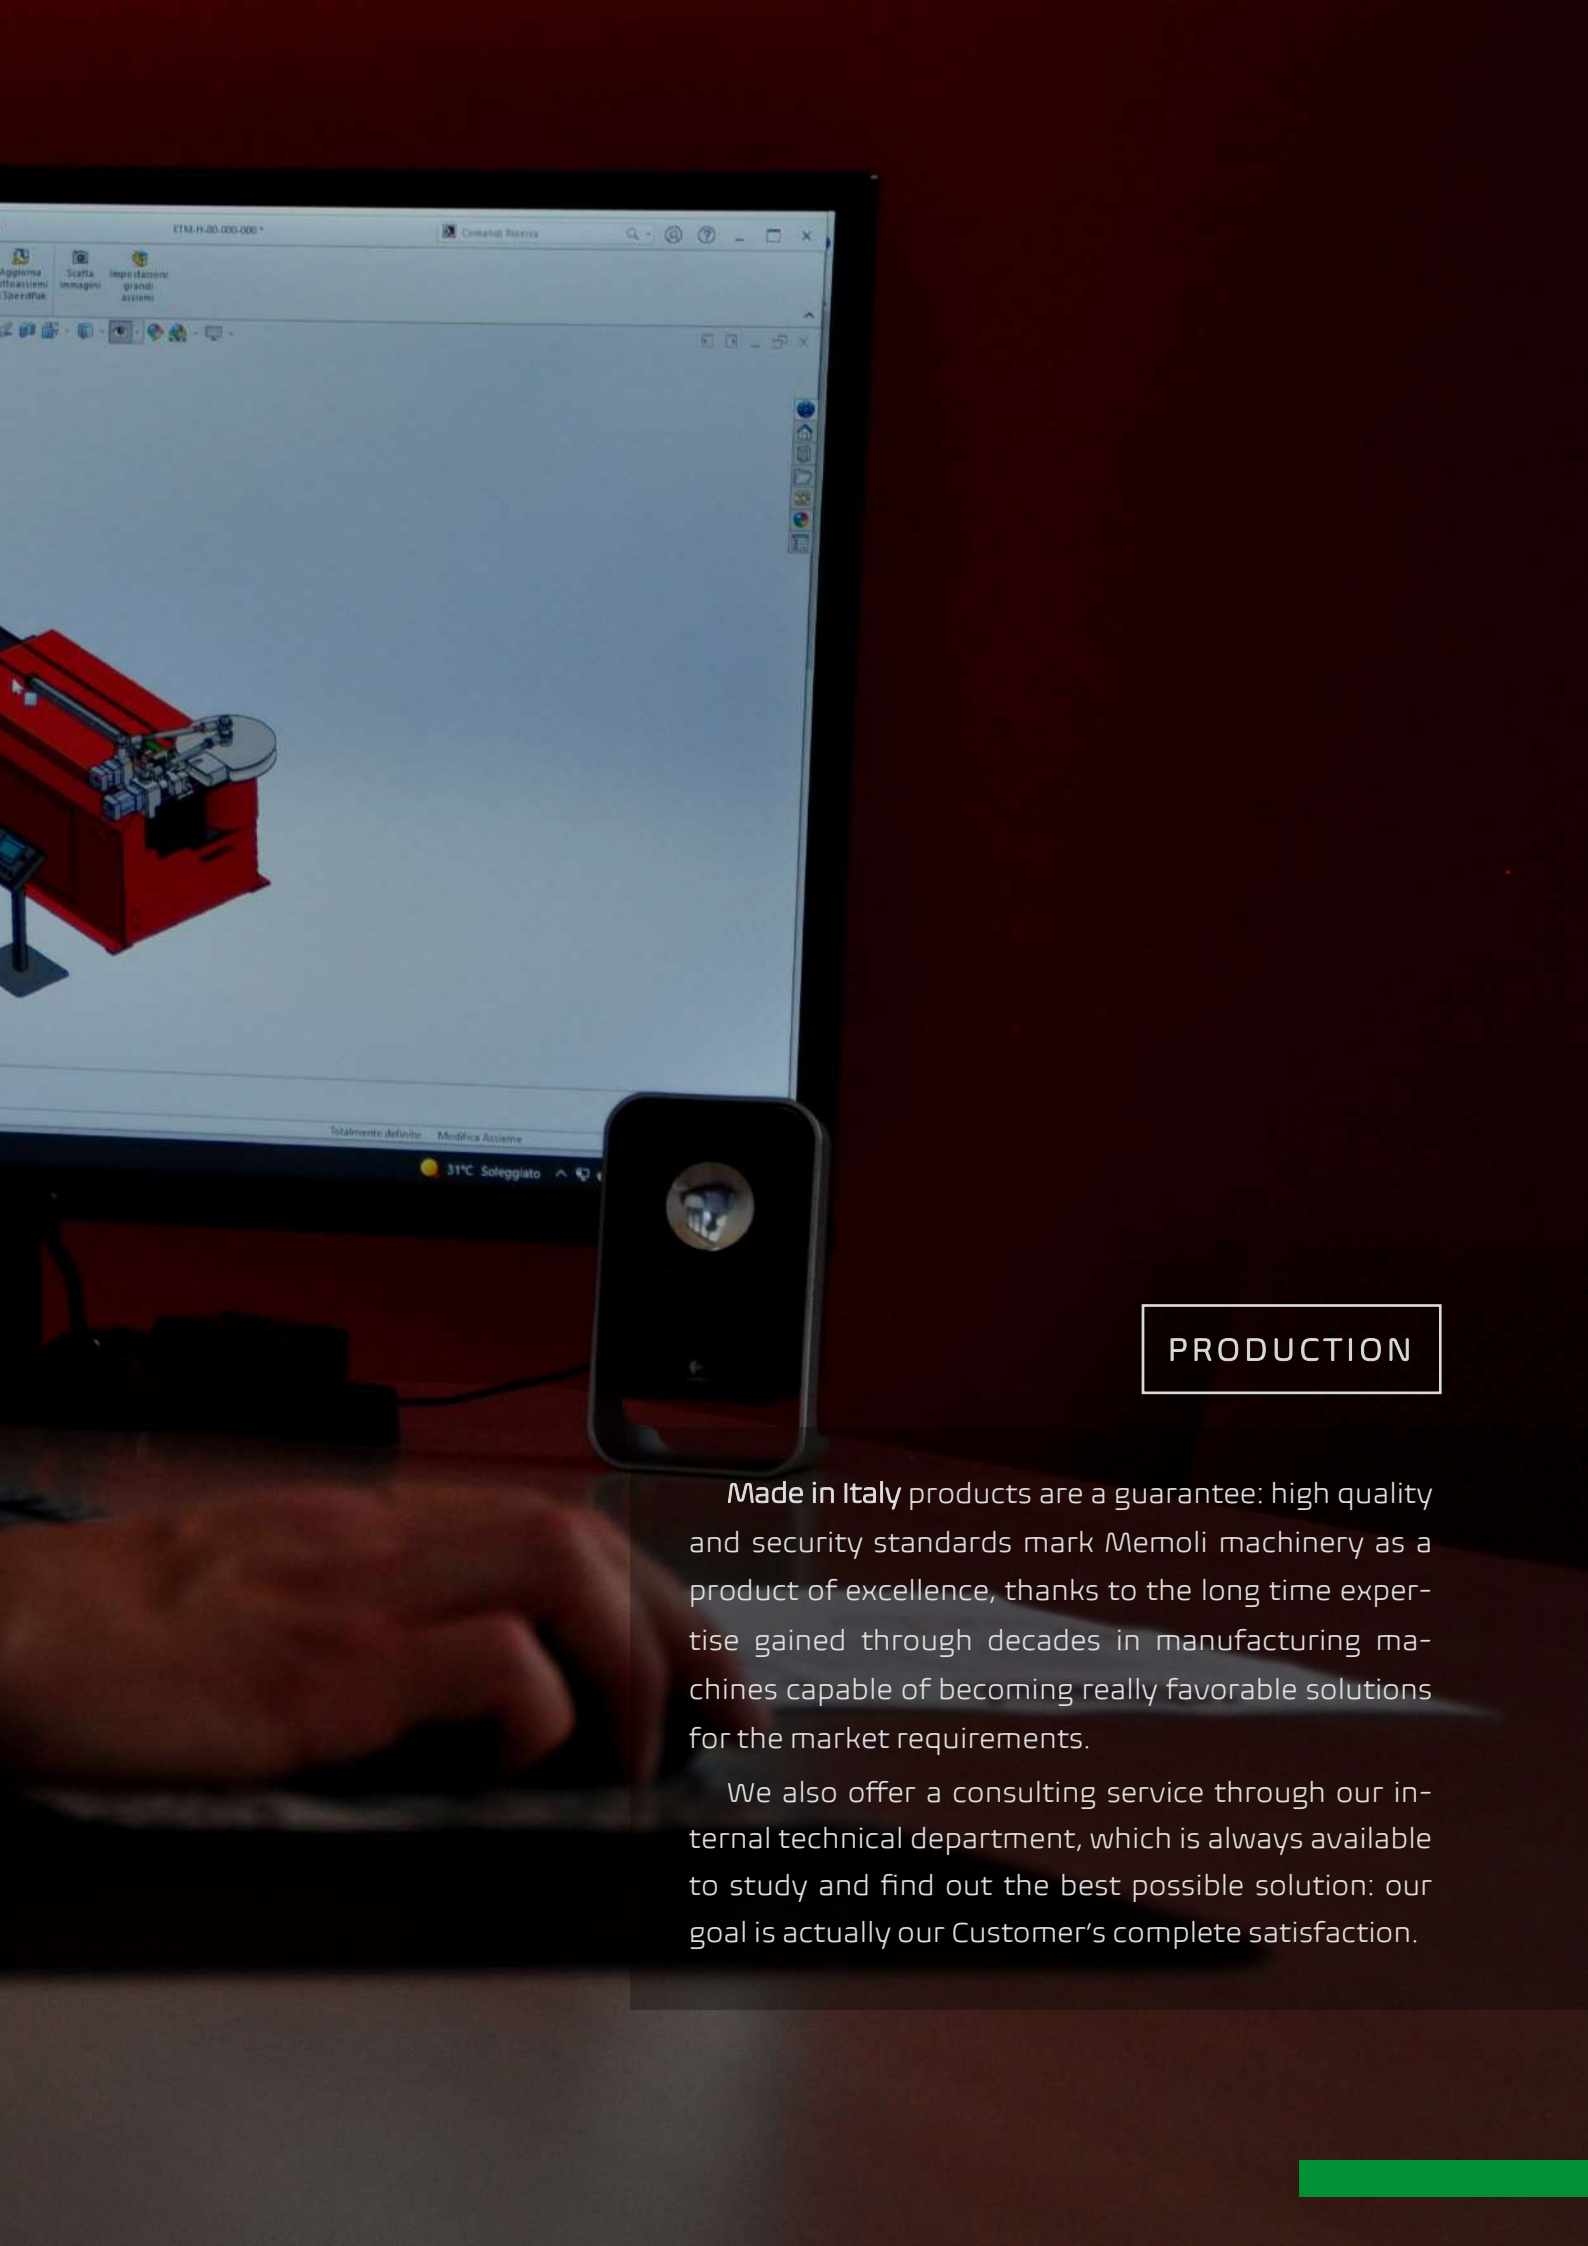

MADE IN ITALY

ABOUT US

Founded in **1967,** MEMOLI Company has been manufacturing bending machines ever since, for more than **55 years.** The Company started as a small craft-men workshop, which then developed its technologies and products to suit them to nowa-days requirements.

MECHANICAL DESIGN

Each Memoli machine is a unique and **customized** product, specifically designed to fulfill every single Customer's needs and resulted from the multiple possible combinations of models, sizes and equip-ment. Our commitment is constantly oriented at Customer satisfaction, because we believe in a long-lasting relationship with our dealers and our direct user Clients.

PRODUCTION

Made in Italy products are a guarantee: high quality and security standards mark Memoli machinery as a product of excellence, thanks to the long time expertise gained through decades in manufacturing machines capable of becoming really favorable solutions for the market requirements.

We also offer a consulting service through our internal technical department, which is always available to study and find out the best possible solution: our goal is actually our Customer's complete satisfaction.

EUREKAMATIC PRO

UNIVERSAL BENDING MACHINE

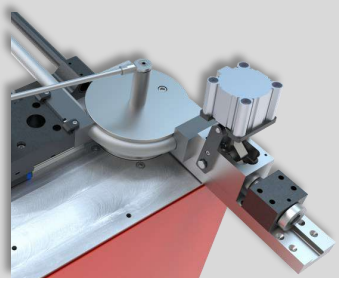

TOUCH

USER FRIENDLY

HIGH CAPACITY

Optional - Automatic vise

One machine, 4 different operations: angle bender, circle-curve bender, mandrel tube bending and non-mandrel tube bending. EUREKAMATIC PRO is the evolution of the historic Eurekamatic, manufactured since 1974 and drawing on **50 years of experience**: guarantee of durability, precision, and reliability.

The machine is equipped with a **Touch Screen** control, designed to be simple and intuitive. The software displays the set bending angle and continuously informs the operator about the position of the bending axis, ensuring maximum control and precision throughout the working process. It allows storage of up to **49 programs,** automatic calculation of the machine's maximum capacity according to the material size, springback programming, and counting of completed bends.

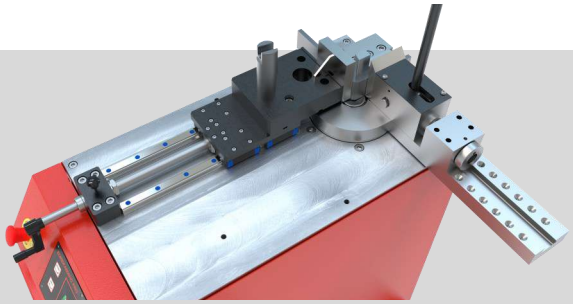

Tool change is quick and intuitive, and the machine can operate in manual**, semi-automatic, or automatic mode**, helping reduce processing times and minimize operational errors. An **automatic clamping vise** is available on request.

Thanks to its modular design, EUREKAMATIC PRO offers various customization options to adapt to the specific operational requirements of **each customer**.

Technical specifications	
Motor power	KW 2,2
Rotation speed	5 rpm
Gears	In oil
Weight	300 kg
Size	870 x 590 x 940 h.

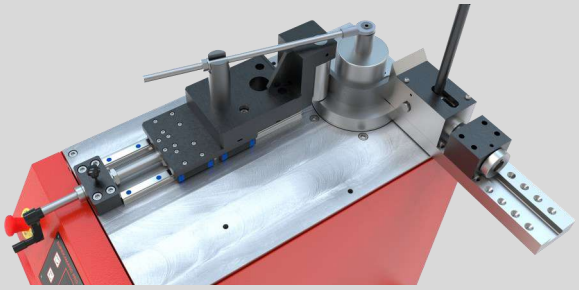

Eurekamatic pro AB-PF

Angle bender

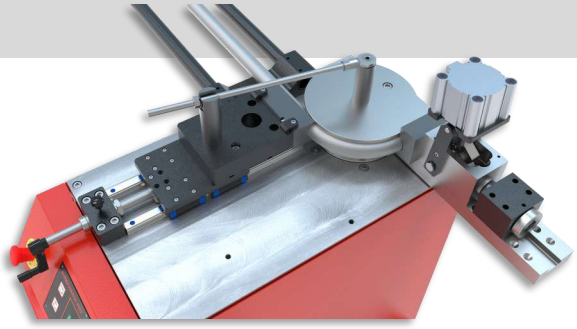

Eurekamatic pro AB-CF

Circle-curve bender

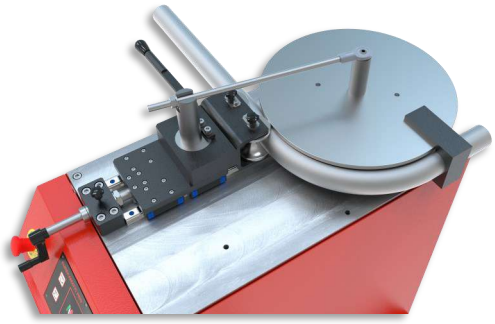

Eurekamatic pro AB-CTA

Tube&Pipe bender with/without mandrel

Eurekamatic pro AB-CT

Scroll-spiral bender

Maximum capacities (mm)				
Material	**AB-PF**	**AB-CF**	**AB-CTA**	**AB-CT**
Steel bar	Ø 35	Ø 35	Ø 35	Ø 35
Square bar	30	30	-	-
Flat bar	100 x 15	100 x 15	-	-
Tube	-	-	Ø 48 x 2	Ø 48 x 3
